Sandy's Warning. A volunteer sham fight took place in England. During the retreat a Scotch volunteer in scrambling through some bushes stuck fast in a hedge. One of the advancing foe, seeing the situation. for a joke, came toward the unfortunate volunteer at full charge, with his bayonet fixed and a ferocious look on his face. The poor fellow in the hedge, seeing the threatening aspect of affairs, bawled out at the top of his voice: "Haud on, you idiot! Dinna you ken it's only in fan?"

Mother Livesey's Well. In the grounds of Livesey Hall, near Blackburn, there is a spring called "Mother Livesey's well." The curious thing about this well is that the water only flows during nine months of the year and is quite dry during the other three months-June, July and August-however wet the weather may be. The water always commences to flow on the same date each year, and never freezes even during the hardest frost.-Leeds (England) News.

Like a Miracle. "The age of miracles has gone," declared the cynic.

"No, it hasn't," said the woman. "My husband told me this morning that he noticed I was wearing last season's hat and gave me money to buy a new one."-Baltimore American.

Heredity. "Oh, hubby, dear, what do you think are the first words our baby will say?" gurgled Mrs. Matron. "Well, if she takes after you, they

Unnoticed Lives. What a massive debt the world owes not only to the religious gostumes of the world, but to the ready and sympathetic, pet unnoticed and forgotten followers whose natures were deep and true enough to receive a genius when he came. Where would the message of Christianity be, what would have become of the beatitudes and the parables in their present form, if loving minds had not valued them as they were spoken and loving mempries cherished them for all future generations? "Who so receiveth a prophet in the name of a prophet" ought to receive a prophet's reward, for there must be a prophetic instinct in his soul.—Rev. Paul Bevere Brothingbam, Unitarian, Boston.

Sea Water and Colds. The delusion that sea water does not give cold is accountable for much harm. A chill may be caught by wetting from sea water as quickly as by wetting from any other water. There is a certain stimulation to the skin from salt, no doubt, but that does not prevent chills from hidiscriminate exposure to wetting by salt water, and chills are fertile causes of illness. Chill to the lower part of the body is always dangerous to any one. It is much more so to a child than to a grown person, though many people seem to think the reverse is the case.
